Mapping Tool Quick Start Guide

Map **Satellite** Search Box

Project: 1
Total Area (ha):
✓ Save Mapping

1

Start by searching for your project location.

Alternatively, navigate to it using your mouse or touch screen to pan and zoom the map.

2

Use this tool to draw your site/s. Left click & release to start drawing.

Continue moving your mouse and clicking around your site until you get back to the starting point. Left click on the starting point to complete the shape.

If you place a point in the wrong spot, just keep going. Once a shape is complete you can edit it using the hand tool.

3

Click 'Save Mapping'

4

Click the blue 'Copy' button to copy a valid map URL which you can then paste into your application form/email to us.

Careful! Don't click and drag to select and copy the URL or copy from the address bar. Just use the blue 'Copy' button. This ensures you copy the entire URL. If you don't, your map link will be invalid.

Your map has been saved! ✕

Your map URL is in the box below.
You will need it to return to your mapping in the future.
Please copy and record it, as necessary.
