

## Biomedical Translation Bridge - venture details report

You are required to complete a venture details report for all current research ventures at six monthly intervals, when you submit your progress or end of project reports. You must use this template and attach the completed report with your progress report or end of project report on the portal. Complete a new template for each venture you are funding.

Your organisation name	[organisation name]
Project number	[project number]
Reporting period	[reporting period start date] to [reporting period end date]

### Details of research venture

Research venture organisation name	[venture organisation name]
Research venture organisation ABN	[venture organisation ABN]
Research venture organisation location	[venture organisation address]
Funding amount provided through BTB	[funding amount (\$)]
Venture contract time period	[start date of contract] to [end date of contract]

- a. What is the nature of the research? Briefly outline the research objectives.

- b. How does the research align with the objective to result ultimately in preventative interventions, cures and treatments for diseases that address health problems of national significance?

- c. Is the research progressing as planned? If it is not progressing as planned what are the reasons?

- d. Is the venture organisation on track to spend all the BTB funds as detailed in your contract with them?

e. Are there any measurable outcomes of the research?

f. Are there any planned events relating to the research ventures that you are required to notify us about in accordance with your agreement?

If yes, provide details of the event including date, time, purpose of the event and key stakeholders expected to attend.
