

### Fact sheet

Australia's anti-dumping system helps 'level the playing field' for Australian industry.

The following concerns, although important to SMEs, are not within the scope of Australia's anti-dumping system.

#### False or misleading claims about goods or services such as:

- country of origin
- nutritional properties
- listed ingredients
- recycled content
- sustainability
- fair trade
- etc.

For queries regarding [country of origin food labelling claims](#) contact the Australian Competition & Consumer Commission (ACCC).

#### Imported products that do not meet Australian industry standards

For more information about Australian standards, refer to [business.gov.au](https://business.gov.au)

#### Claims of anti-competitive or collusive behaviour of Australian businesses

[Contact the ACCC.](#)

#### Intellectual property infringement

Learn how to request [Australian Border Force to prevent infringing goods from being imported into Australia](#)

#### Concerns about the environmental impact of manufacturing processes in Australia

Refer to the [business.gov.au](https://business.gov.au) [Manufacturing Industry Fact Sheet](#)

#### Imported goods that are cheap due to:

- lower quality raw materials
- lower wages
- fewer occupational health and safety regulations, or
- fewer environmental regulations.

Cheap goods may be not 'dumped'.

A product is 'dumped' when it is exported at a price lower than its normal value. The normal value is the selling price in the country of manufacture. For the Minister to impose remedies dumped or subsidised imports must be causing injury to Australian manufacturers.

#### Claims of injury to fruit or vegetable growers

Claims of injury to fruit or vegetable growers where there is no interest from the producers processing the crops to lodge an anti-dumping application.

For example, orange growers cannot apply for measures on orange juice without support from the Australian orange juice manufacturers.
